This app is amazing and very helpful, but I have found a problem. I am unable to sign up or log in (I do not have an account). Every time, the screen turns to a transparent shade of grey and has a spinning circle in the middle for about a second or less. I would like for this problem to be fixed as soon as possible. STILL great app. Keep up the good work. 1. In the first 10 minutes I had this app I got three pop-ups asking me to enable push notifications. First off, respect the fact that I said no. Repeatedly nagging me every few minutes will certainly not change my mind. More importantly, this is a gif app. There is literally nothing that could ever warrant my immediate attention so as to justify a push notification. Get over yourself. 2. Every single time I back out of a reaction gif category to the main reaction gif list, it scrolls me all the way back up to the top. Why? And that is why this app lasted all of 10 minutes on my phone before it got deleted. Gifcat, while I appreciate your effort in creating an app that allows gifs and stickers to enhance my text communication, I feel one feature falls short. The stickers are flawed. Whenever I attempt to attach them to my texts they fail to adjust in the desired size and are difficult to move. This can make a witty comment or remark fall flat. Please look into improving this feature as it has ruined too many conversations and I'm sure I'm not the only one who feel this way. Please help.
